

SMART MEETING FOLLOW-UP ASSISTANT

Generative AI Productivity - Final Project

Lama Alqarani

Idea Selected	Meeting Follow-up Assistant
Input Type	CSV meeting data
Main Goal	Turn meeting data into clear follow-up actions

1. Problem Statement

Meeting notes are often unorganized, which can lead to missed decisions, unclear tasks, and forgotten deadlines. This assistant helps organize meeting notes into clear summaries, decisions, action items, and follow-up messages.

2. Target Users

Employees, team leaders, project managers, and administrative assistants who need to organize meeting notes and follow up on tasks and decisions.

3. R-C-T-F Prompt

Role	Act as a professional meeting follow-up assistant.
Context	You will receive a CSV file containing meeting notes, tasks, responsible persons, deadlines, and status information.
Task	Analyze the file and identify the meeting summary, key decisions, action items, responsible persons, deadlines, open questions, and a short professional follow-up message.
Rule	Do not invent any missing information. If a responsible person or deadline is not provided, write "Not specified."
Format	Organize the output into: Meeting Summary, Key Decisions, Action Items, Open Questions, and Follow-up Message. For Action Items, use a table with Task Responsible Person Deadline Status.

4. Sample Input

Input File: meeting_notes.csv

The CSV file contains meeting date, meeting topic, notes, responsible person, deadline, and task status.

Date	Topic	Note	Responsible	Deadline	Status
2026-10-01	Product Launch	Update website content	Ahmed	2026-10-09	In Progress
2026-10-01	Product Launch	Prepare new product images	Sarah	2026-10-05	Not Started
2026-10-01	Product Launch	Prepare and publish social media campaign	Not assigned	2026-10-07	Not Started
2026-10-01	Product Launch	Confirm customer support training before launch	Not assigned	Not specified	Pending Decision
2026-10-01	Product Launch	Launch the new product	Team	2026-10-10	Planned

5. Sample Output

Meeting Summary

The team is preparing for the product launch scheduled for October 10, 2026. The main tasks include updating the website, preparing product images, publishing a social media campaign, and confirming customer support training.

Key Decisions

- The product launch is scheduled for October 10, 2026.
- The website must be updated before the launch.
- The social media campaign should be published before the launch.

Action Items

Task	Responsible Person	Deadline	Status
Update website content	Ahmed	October 9, 2026	In Progress
Prepare new product images	Sarah	October 5, 2026	Not Started
Prepare and publish social media campaign	Not specified	October 7, 2026	Not Started
Confirm customer support training	Not specified	Not specified	Pending Decision

Open Questions

- Who will be responsible for the social media campaign?
- When will customer support training be confirmed?

Follow-up Message

Hello Team,

Thank you for the meeting. Please continue working on the assigned tasks for the upcoming product launch. Sarah will prepare the product images by October 5, and Ahmed will update the website by October 9. The social media campaign still needs a responsible person, and the customer support training plan is still pending confirmation.

Best regards.

6. Safety Checklist

- Do not upload confidential or sensitive company information to public AI tools.
- Review all AI-generated results before sharing them with the team.
- Do not allow the AI to invent missing names, deadlines, or decisions.
- Remove unnecessary personal information from meeting data.
- Use only approved AI tools according to company security policies.

7. Reflection

This project helped me understand how generative AI can be used to improve workplace productivity.

I learned that using a clear R-C-T-F prompt helps the AI produce more organized, accurate, and useful results.

The Meeting Follow-up Assistant was able to analyze meeting data from a CSV file and convert it into a summary, key decisions, action items, open questions, and a professional follow-up message.

I also learned the importance of protecting sensitive data and reviewing AI-generated outputs before using or sharing them.

In the future, this project could be improved by connecting it to meeting tools so that meeting notes can be processed automatically.
